

Come Visit The Careville Community Center Recycling Corner

Did you know that ...

- aluminum cans may take 350 years to decompose?
- a dripping faucet can waste 20 gallons of water daily?
- a transit bus with seven passengers uses less fuel per passenger mile than a typical car with only a driver in it?
- the energy saved from recycling one glass bottle will light a 100-watt bulb for four hours?
- small changes can make a difference?

It doesn't take much: turn off the lights when you leave the room, don't run the faucet when you brush your teeth, don't let your car idle at the curb. Small actions such as these can make a big difference for our planet. To learn more about "going green," visit the Recycling Corner in the Careville Community Center. Resources on the following topics are available in this section:

- Going Green at Home
- Eating Green
- Driving Green
- Shopping Green

You can also access this information by clicking on the recycling bin outside of the Careville Healthy Eating Market, or by selecting "Recycling" from the menu along the top of the page.

To get to the Careville Community Center:

- Visit www.ACFCcares.com
- Click on the link to Careville
