

Did You Know MY TUTOR Has a New Feature?

MY TUTOR Mobile empowers students to connect to a tutor for a personalized, high-quality learning experience from any mobile device using a MY TUTOR app.

MY TUTOR Mobile enables students to chat with their tutor using text messaging, share files from their mobile locker, and share websites with their tutor. Tutors can share whiteboards, files, and websites.*

- **Mobile Locker:** Students can store files such as essays, spreadsheets, and presentations to share with their tutor in a web-based or mobile session. They can also use their device to take pictures and store them.
- **Save and Review Sessions:** Sessions are automatically saved and available to review 24/7.
- **24/7 SkillsCenter Resource Library:** When students want to work independently, they can choose from thousands of resources—including study guides, practice worksheets, and videos—right from their phones.

For more information, go to www.ACFCcares.com, and click on MY TUTOR under EDUCATION/TRAINING.

** Features depend on the capabilities of the device. Smart phones display chat, and a tutor can share the whiteboard, but it is not a real-time interaction. Tablets also have chat, and the whiteboard is interactive. Android 3.0 can share files and pictures.*
